EXPERIENCE

FULL STACK DEVELOPER

SOULOFTWARE

Sept 2025 - Present

- Develop and maintain full-stack web applications using MERN and Laravel frameworks.
- Implement authentication, role-based access, and API integrations.
- Collaborate with designers and product teams to enhance user experience and system performance.

PROJECTS

MOOD-BASED MUSIC GENERATOR

LARAVEL

- Created a web app that generates and mixes tracks based on the user's selected mood.Built the logic for a streamlined ad-serving platform that scaled
- Integrated dynamic track filtering, mixing controls, and download functionality.

RENTAL PROPERTY MANAGEMENT SYSTEM

REACT + NEXT.JS

- Developed a dynamic platform for managing property rentals with role-based authentication (Admin, Agent, User).
- Agents can add, edit, and manage rental property listings with image uploads and descriptions.
- Users can browse listings, view detailed property information, and request meetings with agents directly through the platform.
