LAIQA ISLAM

FULL-STACK DEVELOPER

ABOUT ME

Full-stack developer working across Laravel, the MERN stack and Next.js. At Souloftware I ship features on live client platforms — clinical workflows, payments, shipping integrations and security for sensitive data. I'm deepening my system design skills — building reliable delivery pipelines with retries, idempotency and circuit breakers — and I care as much about why a feature exists as how it is built.

EXPERIENCE

FULL-STACK DEVELOPER
Sept 2025 – Present

Souloftware

- **iFeelShy — UK online pharmacy (Laravel).** One of five developers, with 80+ commits. Built the prescription, dispensing and ready-to-dispatch workflow, Royal Mail shipping with label generation, and LiveKit video consultations.
- Hardened the same platform for health data: multi-factor authentication, encryption at rest and a full audit trail; added subscriptions and inventory management.
- **ePharmacyFirst** — integrated the SCR API (sandbox) and video-call consultations.
- **YG Cornhole** — Next.js storefront with PayPal Orders v2 checkout and server-side pricing, a CMS, branded customer and admin receipts, and catalog subcategories.
- **York Publishers** — group chat system, profiles with image uploads, and admin and user forms.
- Built an embeddable calculator suite (financial, health, math, unit and date) in Next.js, and marketing-site layouts for agency clients.

EDUCATION

BACHELOR OF BUSINESS ADMINISTRATION
2023 – Present

Iqra University · 3.91 GPA

ACCP — DIPLOMA IN SOFTWARE ENGINEERING
2023 – Present

Aptech

INTERMEDIATE (PRE-MEDICAL)
2020 – 2022

Faisalabad Board · 82.6%

MATRIC (BIOLOGY)
2018 – 2020

Faisalabad Board · 86.1%

SOFT SKILLS

- Leadership
- Problem solving
- Teamwork
- Adaptability
- Critical thinking
- Work ethic
- Emotional intelligence
- Resilience

LAIQA ISLAM

FULL-STACK DEVELOPER

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, GSAP
Backend	Node.js, Express, Laravel, PHP, REST APIs, .NET, NestJS
Database	MongoDB (Mongoose), MySQL, PostgreSQL, SQL Server, SQLite
Integrations	Stripe, PayPal, LiveKit, Royal Mail, Cloudinary, MapLibre GL
System design	Retries & exponential backoff, idempotency, circuit breakers, rate limiting, background workers, pub/sub & SSE, HMAC signing, SSRF protection
Practices	Role-based access, JWT sessions, 2FA, Zod validation, unit testing, Git, Vercel, WordPress

PROJECTS

RELAY — WEBHOOK SERVICE

Next.js 16 · TypeScript · SQLite

- Delivers HMAC-signed webhooks through a background dispatcher with exponential backoff and jitter, idempotency keys, a per-endpoint circuit breaker, FIFO ordering and replay.
- Token-bucket rate limiting, an SSRF guard and zero-downtime secret rotation; 25 unit tests on Node's built-in test runner.

HOOKSCOPE — WEBHOOK INSPECTOR

Next.js · Server-Sent Events

- Request bin that captures any HTTP request and streams it to the browser live over SSE (pub/sub), with one-click server-side replay.

FANHUB+

Next.js 16 · MongoDB

- Fandom portal with eight channels, a content explorer and a merch store.
- Signed JWT sessions, bcrypt, hashed one-time tokens and no account enumeration; later ported to React + Express 5.

EVENTSPHERE

React 19 · Express 5 · MongoDB

- College event platform with three roles, QR check-in and PDF certificates, built as a monorepo with a typed client–API contract.

FURSHIELD

Next.js 16 · MongoDB

- Pet care platform for owners, vets and shelters — medical timelines, appointments, adoption and signed Cloudinary uploads.

IMPERIUM ROMANUM

Next.js · MapLibre GL

- Interactive map of 2,000 years of Roman borders, fed by a data pipeline that clips historical borders to real coastlines.
