LAIQA ISLAM

FULL-STACK DEVELOPER

ABOUT ME

Full-stack developer working across Laravel, the MERN stack and Next.js. At Souloftware I ship features on live client platforms — clinical workflows, payments, shipping integrations and security for sensitive data. I treat the interface, the API and the database as one problem, and I care as much about why a feature exists as how it is built.

EXPERIENCE

FULL-STACK DEVELOPER
Sept 2025 – Present

Souloftware

- **iFeelShy — UK online pharmacy (Laravel).** One of five developers, with 80+ commits. Built the prescription, dispensing and ready-to-dispatch workflow, Royal Mail shipping with label generation, and LiveKit video consultations.
- Hardened the same platform for health data: multi-factor authentication, encryption at rest and a full audit trail; added subscriptions and inventory management.
- **ePharmacyFirst** — integrated the SCR API (sandbox) and video-call consultations.
- **YG Cornhole** — Next.js storefront with PayPal Orders v2 checkout and server-side pricing, a CMS, branded customer and admin receipts, and catalog subcategories.
- **York Publishers** — group chat system, profiles with image uploads, and admin and user forms.
- Built an embeddable calculator suite (financial, health, math, unit and date) in Next.js, and marketing-site layouts for agency clients.

EDUCATION

BACHELOR OF BUSINESS ADMINISTRATION
2023 – Present

Iqra University · 3.91 GPA

ACCP — DIPLOMA IN SOFTWARE ENGINEERING
2023 – Present

Aptech

INTERMEDIATE (PRE-MEDICAL)
2020 – 2022

Faisalabad Board · 82.6%

MATRIC (BIOLOGY)
2018 – 2020

Faisalabad Board · 86.1%

SOFT SKILLS

- Work ethic
- Emotional intelligence
- Resilience

LAIQA ISLAM

FULL-STACK DEVELOPER

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, GSAP
Backend	Node.js, Express, Laravel, PHP, REST APIs, .NET, NestJS
Database	MongoDB (Mongoose), MySQL, PostgreSQL, SQL Server, SQLite
Integrations	Stripe, PayPal, LiveKit, Royal Mail API, Cloudinary, MapLibre GL, Web Audio
Practices	Role-based access, JWT sessions, 2FA, Zod validation, Git, Vercel, WordPress

PROJECTS

FANHUB+ *Next.js 16 · MongoDB*

- Fandom portal with eight channels, a multi-filter content explorer and a merch store with checkout.
- Signed JWT sessions, bcrypt, hashed one-time tokens and no account enumeration; later ported to React + Express 5.

EVENTSPHERE *React 19 · Express 5 · MongoDB*

- College event platform with three roles, QR check-in and on-demand PDF certificates.
- Monorepo with a shared, typed contract between client and API; serialized DTOs so nothing leaks.

FURSHIELD *Next.js 16 · MongoDB*

- Pet care platform for owners, vets and shelters: medical timelines, appointments and adoption.
- Signed Cloudinary uploads for medical documents; HTTP-only JWT sessions.

IMPERIUM ROMANUM *Next.js · MapLibre GL*

- Interactive map of 2,000 years of Roman borders on a scrubbable, continuously crossfading timeline.
- Data pipeline that clips historical borders to real coastlines — fully static, no tiles or API keys.

MOODBEAT *Laravel · Tone.js*

- Browser music studio: keyboard instruments, mood-matched tracks, a mixer, vocals and song export.
